TO WHOM IT MAY CONCERN:

We would like to thank the T&W Church Solutions Team of Kurt Williams, Bryan Crostreet and Rick Wright, along with the KJG Architecture Team of Kelly Good, Jeremy Duff and Barry Knechtel for a job well done. The Delphi United Methodist Church (DUMC) relocation project was not an easy one and you all definitely rose to the occasion.

Due to an extremely tight building budget, the value engineering process to reduce cost was critical. The T&W Church Solutions Process achieved more than just value engineering, the Process actually produced "Value Visioning" for the DUMC Team. The creative way that the facility was designed and built to be multi-use, while meeting the needs of our various ministries, allowed us to keep limited ministry dollars in doing ministry, rather than building.

The ability for DUMC to see the bidding, select the subcontractors and contribute with our own volunteer resources was excellent. Your patience and "coaching" with our volunteer resources was greatly appreciated. Yes, we saved money. No, we would not do it again. Any challenges faced on our project, tended to be a direct result of our own volunteer efforts.

T&W Church Solutions followed through on their commitments, from start to finish, with quality and integrity. When we are ready for Phase 2, we know who to call. Thank you for a great project!

Respectfully,

Delphi United Methodist Building Committee
